**TO WHOM IT MAY CONCERN**

**CLIENT : PETRONAS GAS BERHAD**  
**PROJECT : CENTRALISED UTILITY FACILITIED PROJECT - GEBENG**  
**FW PROJECT NO. : 1-15-6851**  
**SUBJECT : INSULATION WORKS**

The Centralized Utility Facility Project is complete and now in commercial production.

Iryas Inc (M) Sdn. Bhd. (insultec division) were the Insulation Contractors for the Centralized Utility Facility Project of Petronas Gas Berhad. Insultec performed the work as a contractor of Petronas Gas Berhad.

Insultec successfully completed the Insulation supply and installation work under very demanding schedule circumstances. At all times Insultec personnel and in particular their Project Manager (Naveen Kad) were very responsive to the needs of Foster Wheeler and the project schedule.

Insultec's final contract value ended at US\$ 947,368.40 (RM 3,600,000) and included the supply and installation of insulation work, supply / application of painting and supply / erection and dismantling of scaffolding. This work was performed in an accelerated period with peak manpower strength of 150.

This world class Utility Project was complete on schedule with Insultec being a major contributor to the success. In summary we found the professional management team of Insultec maintained a positive and competitive attitude through completion of the work, and we look forward to maintaining a lasting business relationship with them.
