TO WHOM IT MAY CONCERN

Project: Yemen LNG Project Process Trains 1 & 2
Subject: Insulation Works: Subcontract Agreement No: YGA-292/Insultec
Date: 4/10/2010

Insultec has been the Subcontractor for the supply and installation of all Insulation Work of Process Trains 1 & 2.

Insultec has successfully supplied and installed cryogenic, hot and acoustic insulation materials (mineral wool, cellular glass, PIR, cladding, mastics, vapour barriers) for the two Process Trains at Yemen LNG Project.

INSULTEC'S scope of work included:

- Detailed take off from drawings and isometrics
- Supply of hot and cryogenic insulation materials
- Application of insulation materials on site to piping, equipment, including the cryogenic exchangers.

The total area of insulation, were works have been performed, was 105,000 square meters.

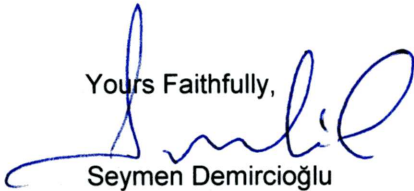

INSULTEC supplied approximately 300 containers of insulation, cladding and accessory materials mainly from Europe, USA and Asia. For the fabrication of PIR and cellular glass at site, Insultec established an onsite fabrication and insulation cutting facility and used an advance cutting CNC machine.

Insultec carried out works at the two trains within a 22 months period.

At peak INSULTEC had more than 250 personnel at the jobsite. INSULTEC provided competent staff and sufficiently skilled manpower to execute the job, through good planning, quality control, safety and workmanship. We found Insultec to be knowledgeable, cooperative and experienced in their field of work.

Without any hesitation we recommend INSULTEC as an insulation contractor for performing similar orders.

Yours Faithfully,

Seymen Demircioğlu
